This booklet was designed to complement the U. S. Landing Craft section of the ONI 54 series. Together, these two booklets will cover the vast fleet of Allied small craft and large beaching types that has sprung up in the last 18 months. For more complete information, another standard manual, issued in a confidential form for planning purposes, can be consulted.

In studying the two lists shown here, it is important to remember that these represent all the Allied types, and that a majority of these types are not numerically important.
